ENDOTRACHEAL TUBE

NexGen has an Endotracheal Tube for Every Need. Nexgen's high-quality, cost-effective endotracheal tubes are available in a variety of sizes to fit a wide range of applications. Tubes are available with or without a high-volume, low-pressure cuff. You don't have to sacrifice quality patient care to reduce your supply costs.

Long cuff length reduces damage on the tracheal wall by distributing pressure over a large surface area. Smooth, frosted cuff conforms to the trachea to form a leak-free seal with minimum tissue trauma. Marked Pilot Balloon. Clearly marked tube size and manufacturing batch number allow immediate identification. Balloon is highly sensitive to changes in cuff pressure, permitting accurate monitoring. Bull-Nose Tip, Short, smooth tip minimizes contacting tracheal mucosa and lessens the trauma of intubation. Smooth Murphy eye, Polished to ensure atraumatic intubation and extubation. Intubation Guide, Easy-to-read, marks assist in tube placement. Thermosensitive tubing material, PVC tube softens at body temperature to conform to the shape of the trachea, yet remains kink-resistant for patient safety. Connects smoothly to main tube for maximum patient comfort.

Full-Length Split-Resistant, Radiopaque Strip, High radiopacity aids verification of intubated position. Split-resistant to keep tube intact when cut.

Endotracheal Tube, Cuffed

Endotracheal Tube, Cuffed
High-Volume, Low-Pressure Cuff

Manufactured with strong tube walls to ensure the proper ventilation for all patients. A variety of sizes ensures a safe airway is maintained throughout the surgery.

- High-volume, low-pressure, barrel-shaped cuffs.
- Responsive pilot balloons.
- Finely heat-welded cuffs (cuffed versions).
- Bull-nose tips.
- Split-resistant radiopaque lines.
- Smooth Murphy eyes.
- Kink-resistant thermosensitive tubes.

Endobronchial Tube

Endobronchial Tube

Endobronchial Tube

- Use for one-lung ventilation, in the OPS of bronchus, thoracic surgery and so on.
 - Made of medical grade PVC, transparent ,soft and smooth.
 - Available with left-sided and right-sided.
 - Different side of tubes distinguished by two different cuff.
 - Equipped with two suction catheters, one stylet and one switch connector.
 - Easily operate one-lung ventilation by switch connector
- Left and right sided size: 28Fr, 32Fr, 35Fr, 37Fr ,39Fr, 41Fr.

Endobronchial Blocker Tube

Endobronchial Blocker Tube

- Endobronchial Blocker Tube is designed to differentially intubate a patient's bronchus inorder to Isolate the left or right lung for procedures that require one-lung ventilation.
- Size 5fr, 7fr, 9fr meeting clinical needs, for all patients from pediatric to adult.
 - Ultrathin cuff is made from PU in medical grade, thickness 0.028mm, comfortable and soft. It creates a superior seal and reduces microaspiration, when deflated it is very close to blocker tube, so it can pass ETT easily.
 - Twist lock design, easy operation, secure locking.

Suction Catheter

Suction Catheter

Suction Catheter

- Made of non-toxic PVC.
- Atraumatic, soft and rounded open tip with two lateral eye.
- Soft and kink resistant PVC tubing.
- Colour coded connector for easy identification of size.
- Extra smooth low friction surface tubing facilitates easy intubation.
- With X-ray or without X-ray.
- An option of transparent or frosted tubing.

Size: 5, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24Fr/Ch.

Infant Mucus Extractor

Infant Mucus Extractor

- Suitable for obtaining mucus specimen for microbiological examination.
- Also suitable for aspiration of secretion from Oropharynx of new born babies to ensure free respiration.
- An option of transparent or frosted tubing.
- Atraumatic, soft and rounded, open tip with two lateral eyes.
- Clear transparent container permits visual examination of aspirate.
- Spare screw top lid is provided to seal the container for safe transportation of specimen to the laboratory or aseptic disposal of container.
- Also available with Bacterial barrier filter at suction end.
- Suction tube lengths available.

Size: 6, 8, 10, 12, 14, 16, 18, Fr/Ch.

Aero Chamber for asthma treatment / Aerochamber with silicone mask

Aero Chamber For Asthma Treatment / Aero Chamber with Silicone Mask

This product is a spacer for aerosol to be used with Metered Dose Inhalers for treatment of asthma.

Features:

- Helps target medicine to your lungs.
- Helps keep you from spraying drug on the back of your throat.
- Clear mouthpiece helps caregiver to see valve movement to coordinate timing of medication actuation.
- Valve and end cap remove easily for cleaning, and the valve can be replaced, so your chamber lasts longer.
- Helps eliminate unpleasant tastes of some medications.
- Detachable masks allow children to switch to the mouthpiece at as young an age as possible, for better drug delivery, without the cost of buying a new chamber.
- Available in different colors.
- Suitable for infant, baby, child and adult.

Respiratory Exerciser

Respiratory Exerciser

Ref. No: NMR103501

How to use:

1. Hold the unit in an upright position
2. Exhale normally and then place your lips tightly around the mouthpiece at the end of the tubing.
3. Low flow rate – Inhale at a rate to raise only the ball in the first chamber. The second chamber ball must remain in place. This position should be held for three seconds or as long as possible whichever comes first.
4. High flow rate – Inhale at a rate to raise the first and second chamber balls. Ensure that the third chamber ball remains in the rest position for the duration of this exercise.
5. Exhale – Take out the mouthpiece and exhale normally. relax (Repeat) – Following each prolonged deep breath, take a moment to rest and breathe normally. This exercise can be repeated according to physician's instructions.

Note: Tilting the unit forward can make the respiratory exerciser easier for patients who find it different to raise the ball or balls while holding the unit in an upright position.

Emergency Manual Resuscitator

Silicone Resuscitator

Silicone Resuscitator

The Silicone resuscitator is intended for pulmonary resuscitation for neonates through to adults.

Features:

- Silicone resuscitator (except mask, oxygen tubing and reservoir bag) can be autoclaved repeatedly at 134 degree celsius.
- It is semi-transparent and come with a pressure limitation valve for patient safety
- A textured surface ensuring a firm grip and providing effective ventilation. Patient connector is 22/15mm.
- 100% latex free.

Accessories:

Silicone mask, oxygen tubing, reservoir bag.

PVC Resuscitator

PVC Resuscitator

The PVC resuscitator is intended for pulmonary resuscitation for neonates through to adult.

Features:

- It is semi-transparent and come with a pressure limitation valve for patient safety.
- A textured surface ensuring a firm grip and providing effective ventilation. Patient connector is 22/15mm.
- PVC resuscitator conforms to the standard: ISO10651-4:2-002, and it also conforms to Council Directive MDD/93/42/ECC concerning Medical Devices.
- For single patient use only.
- 100% latex free.

Accessories:

PVC mask, oxygen tubing, reservoir bag.

CPR Mask

CPR Mask

CPR Mask

Item No:NMR1046

The CPR mask is designed to provide protected rescue breathing for any patient and may also be used with a resuscitators. It helps protect rescuers in an emergency situation.

Features:

- It is unfoldable.
- Prevents direct contact during artificial respiration.
- Transparent dome allows rescuer to visually check for patient's lip colour and vomitus.
- Made of durable plastics for easy cleaning and long product life.
- Latex free.
- Optional accessories: alcohol pad, PVC glove.

NexGen UROLOGY

Smooth tapered tip of catheters facilitates easy introducing into the urethra
The drainage eyes are accurately formed to permit effective drainage.

The symmetrical balloon expands equally in all directions so as to perform its function of retaining bladder efficiently.

The smooth outer surface is specially treated with medical grade silicon fluid which facilitates easy passage through urethra.

Color Coded sleeves are useful for easy and rapid size identification.

Plastic valve permits simple use of all commonly used type of syringe nozzles for easy inflation / deflation and are proved to be more efficient than Rubber valves.

1. Catheter balloon have been individually inflated and checked for material integrity, symmetry and the inflation/deflation system integrity to ensure the perfect functioning.
2. Silicone coating gives an unmatched smooth finish for trauma-free catheterization and high degree of patient comfort.
3. The non-return valve makes syringe insertion easy and trouble-free
4. Extremely flexible, easy-to-bend in any direction, the taperless shaft conforms to the patient's anatomy. Constructed with large circular drainage lumen, it achieves maximum and effective urine flow.
5. Inflation lumen is built-in to avoid interior or exterior protrusion thereby, allowing the catheter to bend in any direction.
6. Elliptical side eyes feature a special beveled edge. Not only does this improve smoothness and reduces trauma, but also giving maximum fluid flow.

All Silicone Foley Catheter

All Silicone Foley Catheter

- Medium length round tip with two opposing eyes.
- Maximum softness and biocompatibility for enhancing patient comfort.
- Technically advanced process makes the balloon an integral part of the tip.
- No "glue" ridge to irritate the urethral upon insertion and removal
- Remarkably smooth, the non-stick surface of silicone makes it highly resistant to encrustation.
- The shaft allows for an approximately 30 % larger lumen, which can permit longer use and promote better drainage of sediment and blood clots.
- The ribbed funnel ensures an easy, leak-proof connection while the clear connector and clear shaft allows, visual examination of drainage.

Infusion Pump

Infusion Pump

Infusion Pump

- Item No. : NMDE6201
- Unique door-free structure and big LCD screen, making it easier and more convenient to operate and in the meanwhile avoiding problems of pump stuck and fluid leakage.
 - Unique function of bedside infusion supervision, making patients and their relatives more assured while also reducing nurses' workload. If used with infusion supervision system and nurse beeper, a bed No. can be set in the machine and then its infusion progress and alarm information can be displayed on the infusion supervision system located at Nurse's Station and SK Data Collector Terminal. The nurse, upon seeing and hearing the signal, can go and handle the unit accordingly.
 - All brands of standard IV sets are compatible. With only a simple calibration, it can guarantee an accurate, smooth and safe infusion.
 - When detecting air in line or occlusion, an audio and visual alarm signal shall be given instantly while at the same time the machine stops operation automatically, thus reducing the danger of air embolism to patients.
 - The infrared sensor shall give alarm signal when detecting excessive air pressure.
 - Application of double CPU, making the infusion process safer and more reliable.
 - Alarm signals are given in case of malfunction or operation error and the machine stops operation automatically.

Feeding Pump

Ref. No. : NMDE620301

Feeding Pump

- Ref. No. : NMDE620301
- Easy to operate and user friendly
 - Audible and visible alarms includes overtime alarm, occlusion alarm, empty alarm, infusion over alarm, low battery alarm, operation error alarm, etc.
 - Large colorful LCD display.
 - Purge and Reverse function.
 - Two Power supplies: AC power supply or built-in rechargeable Lithium-ion polymer battery.
- Technical Specification:**
1. Flow rate: 1 ml/h~500ml/h, 1 ml/h increment.
 2. Target infused volume / Tar. volume: 0~9999ml, (0~999.9ml, 0.1ml increment; 1000~9999ml, 1ml increment).
 3. Infused volume: 0~9999ml, (0~999.9ml, 0.1ml increment; 1000~9999ml, 1ml increment).
 4. The flow precision is $\pm 10\%$ according to the clinical setting.
 5. Purge and reverse rate: 500ml/h.
 6. Fuse specification: F1AL/250V, 2 pieces per pump.
 7. Power supply: AC 100V~240V, 50/60Hz, $\leq 25VA$,
 8. Internal Lithium-ion polymer battery: DC 11.1V, $\geq 1600mAh$.
The battery backup is approx. 5 hours when using a fully charged battery and running at 25ml/hr.
 9. Operating condition:
Temperature 5~40oC,
Relative humidity: 20~90%.
Atmospheric pressure: 860hPa~1060hPa.
 10. Safe grade: Class I, type CF
 11. Size: 130 mm (W) \times 150mm (H) \times 100mm (D)
 12. Net weight: approx. 2kg

Fingertip Pulse Oximeter

Fingertip Pulse Oximeter

Fingertip Pulse Oximeter

Ref. No.: NMDE840001

The Scope of Application:

Pulse oximeter is a very important and common device to check patient blood-oxygen saturation (SpO2) level and pulse rate. As a small, compact, simple, reliable and durable physiological monitoring device, Fingertip pulse oximeter greatly enhances patient care. It is widely applied in clinic, hospital, social medical organizations, first aid, and homecare etc.

Technical Specifications:

Patient Range

• Adult and Pediatrics

SpO2

Measurement range	70% - 99%
Resolution	1%
Measurement accuracy	80% - 99%: ±2%
	70% - 80%: ±3%
	≤69%: no definition

Pulse Rate

Measurement range	30 - 235bpm
Resolution	±1bpm
Measurement accuracy	30 - 99bpm: ±2bpm
	100 - 235bpm: ±2%

Display

Type	Digital LEDs display
Parameters	SpO2, PR, Pulse bar
Mode	1 display mode

Alarm

Fingertip Pulse Oximeter

Features:

- Small & lightweight design.
- Digital LEDs display.
- Display SpO2, PR, and Pulse bar.
- Low power consumption; automatically power off.
- Battery-low indicator.
- 2 AAA alkaline or rechargeable batteries.
- Accommodates widest range of finger sizes from pediatric to adult.

Mechanical

Dimension	58mm (L) * 32mm (W) * 34mm (H)
Weight	50g (including batteries)

Battery

Two AAA 1.5V, 600mAh alkaline batteries could be continuously operated as long as 30 hours.

Environmental

Operation Temperature	5℃ - 40℃
Storage Temperature	-20℃- 55℃
Operation Humidity	≤80%, no condensation
Storage Humidity	≤93%, no condensation

Measurement Performance in Low Perfusion Condition

Required the test equipment (BIO-TEK INDEX Pulse Oximeter tester) the pulse wave is available without failure when the simulation pulse wave amplitude is at 0.6%.

Interference Resistance Capacity against Ambient Light

Device works normally when mixed noise produced by BIO-TEK INDEX Pulse Oximeter tester.

Disposable ECG Electrode

Disposable ECG Electrode

Item No.: NME1400

Disposable ECG electrodes, which are used for various ECG tests in diagnostic or monitoring, It uses an Ag/AgCl sensor element and solid conductive & adhesive hydro-gel for adhesion.

The Ag/AgCl sensor element has the best sensitivities and the solid conductive & adhesive hydro-gel has very low impedance and is non-irritating, non-sensitizing and non-cytotoxic to the skin. All electrodes are Latex free.

- Adult, child available.
- Different shape, sizes, materials available.

Auto disable Syringes

Auto Disable Syringes

Auto Disable Syringes

Item No.: NMH0006

- Main structure of sterile auto disable syringe for single use: RPF, barrel, plunger, piston and its barrel and piston are in interference fit, so as to make sure of seal.
- RPF: Such syringe has been in a design that RPF will start all by itself just it has been used in order to prevent if from reusing.
- Barrel of the auto disable syringe is transparent to observe solution and read its measure through surveyor's rod graduation on it. And its top is designed as RPF area.
- Both barrel and plunger of the auto disable syringe are made from biomedical polymer material whose biocompatibility conforms to standards.
- Model of auto disable syringe: luer slip, luer lock.

Blood Collection Needles & I.V Catheter

Blood Collection Needles (Multi-Sample)

Blood Collection Needles (Multi-Sample)

Item No: NMH0203 Pen type

- Multi-sample needles permit several samples to be taken with a single puncture.
- Sharp and smooth edges make penetration painless, easy connection to rubber stoppers.
- Available in 18G, 20G, 21G, 22G, etc.

Item No: NMH0204 with scalp vein set

- Soft and transparent tube, can observe the vein blood flow clearly.
- Double wings make puncture safe.
- Available in 18G, 20G, 21G, 22G, 24G, etc.

Disposable Fistula Needles

Disposable Fistula Needles

Item No: NMH0301

- Fixed type, Rotating type.
- Ultra-thin wall needles allow maximum blood flow.
- Ultra-sharp for easier penetration.
- Siliconized for smoother, more comfortable penetration.
- Easy removal of luer cap.
- Double entry points on needle for quick collection.

I.V Catheter (I.V Cannula)

I.V Catheter (I.V Cannula)

- Easy dispenser pack.
- Color-coded casing cap allows for easier identification of catheter size.
- Translucent catheter hub and flashback chamber allows for easy detection of blood flashback at vein insertion.
- Teflon Radio-opaque catheter.
- Precision finished PTEE catheter assures stable flow and eliminates catheter
- Tip kink during venipuncture.
- Can be connected to syringe by removing filter cap to expose Luer taper end.
- Use of hydrophobic membrane filter eliminates blood leakage.
- Close and smooth contact between catheter tip and inner needle enables safe and smooth venipuncture.
- Safety design can shield the cannula after use, preventing needlepoint from stabbing nurse, patient or other people, which can effectively reduce infection.
- Available in 14G, 16G, 18G, 20G, 22G, 24G etc.

Disposable Spinal Needle

Disposable Atraumatic Spinal Needle

Disposable Atraumatic Spinal Needle

- Item No.: NMH0504 90mm
- Specially designed needlepoint shape causes no trauma of spinal dura mater, and sutomatically closes the puncture port after withdrawal of the needle to reduce the leak of cerebrospinal fluid, with the occurrence of PDPH evidently declined.
 - Proper shape and position of the side hole maintains adequate flow and reduces imperfect retardations as well.

Disposable Spinal Needle (Quinke Type)

Disposable Spinal Needle (Quinke Type)

Item No.: NMH0503 90mm

Disposable Spinal Needle

Disposable Spinal Needle

- Item No.: NMH0502 90mm
- Completely transparent needles stand provides convenience to observe the outflow of the cerebrospinal fluid.
 - The needle core with pin allows a good joint of needle edge.

Disposable Epidural Needle

Disposable Epidural Needle

- Item No.: NMH0501 90mm
- Bend and round head helps to reduce largely the risk of piercing spinal dura mater and ensure the smooth pass of the canula.
 - The needle tube is scaled for the purpose of depth control.
 - The needle stand with wings is easy to hold and to perform needle insertion.

Needles & Combined Spinal & Epidural Block

Disposable Anesthetic Needle

Disposable Anesthetic Needle

- Item No.: NMH0505
- Applied to the injection of anesthetic and emergency liquid medicine for local body anaesthesia, pain ease or emergency.
 - Single use to avoid cross infection.

Combined Spinal & Epidural Block

Combined Spinal & Epidural Block

- Ref. No.: NMH050601
- Size: 25G x 110 mm & 16G x 80 mm
- Bleeding the advantages of both atraumatic spinal needle and epidural needle, featuring the excellence of exact effect, significant muscle relaxing effect, small amount of anesthetic for local anaesthesia and no PDPH on the whole.
 - Capable of performing continuous epidural anaesthesia following spinal anaesthesia or postoperative pain ease as per clinical requirements.

Disposable Puncture Set for Local Anesthesia

Disposable Puncture Set for Local Anesthesia

- Item No.: NMH0507
- Meet the requirements of professional standards and guaranteeing safety and reliability of the product.
 - Complete configurations and shortening of prepare period before operation anaesthesia.
 - Single-Use to avoid cross infections.
 - According to clinical demand, may provide puncture sets for spinal, epidural and nerve block or combined spinal/epidural puncture sets.

Disposable Blood Transfusion Sets

Hydrocolloid Wound Dressing

Hydrocolloid Wound Dressing

Hydrocolloid Wound Dressing

Item No.: NMMD4907

• Hydrocolloid wound dressing is made of a wound contact layer of hydrocolloids and a top layer of either semi-permeable polyurethane film or polyurethane foam. On contact with wound surface, the hydrocolloid wound dressings create a moist environment, which can reduce pain, promote the formation of granulating tissue, prohibit bacteria infection and speed up the healing process.

Product Characteristic:

- The hydrocolloid adhesive is skin friendly.
- When interacted with skin moisture, the hydrocolloid adhesive provides a secure sealing on the wound edge.
- The rounded corner design prevents the dressing from rolling and self adhesion.
- High absorption capacity for wound fluid.
- Good healing efficacy for light to medium exuding wounds and leg ulcers.
- Ease of application.
- Semi-transparent nature makes it easy to observe progress in wound healing.
- Various different sizes for different wounds on different body locations.

Product Indication:

- Can be used to control skin ulcer, leg ulcer and pressure sores.
- Light abrasion wounds.
- Second degree burn wounds.
- Necrotic wound.
- The bordered and standard products are mainly used on light medium exuding pressure sores and leg ulcers.
- The thin products are mainly used on dry to light exuding superficial wounds, surgical post operative wounds and abrasions. It is also used on small wounds towards the end of healing phase.

Dressing procedure:

- Irrigate / clean the wound with sterile isotonic saline solution or sterile water.
- Gently dry the surrounding skin and ensure that it is free of any residue.
- Choose the size and shape of dressing which is most suitable. It should extend 1.5 to 2.0cm beyond the wound margin.
- Remove the large part of the protective paper from the dressing.
- Apply the exposed part of the dressing, centering it over the wound bed.
- Then remove the small part of the protective paper from the dressing and apply it.
- Finalize application of the dressing, making absolutely sure that the edges of the dressing adhere well.

Other important issue:

- The dressing is sterile and disposable, do not use product with damaged package.
- Change dressing immediately in case of leakage edge of the dressing.
- Use the dressing for a maximum of days, change dressing when full absorption is reached.
- The dressing should not be used other than for those wound indicated in "Product indication".
- **Size:** 5x5cm, 10x10cm,etc.
